

**EURAF in Spain**

**Spanish Agroforestry Association (AGFE)**

**Agroforestry in the CAP in Spain**

**Main activities**

# Spanish Agroforestry Association

## AGFE: Asociación Agroforestal Española

- Recently officially created
- 40 members, plus one company and one regional (Catalonia) institution involving more than ten people
- Individuals include researchers and other stakeholders (extension services actors, public administrations, ...)
- We expect more members now that AGFE has been officially created

# Agroforestry in the CAP in Spain

- We participated with documents, meetings and develop our ideas improving the consideration of agroforestry in the two CAP pillars
- Pilar II (measure 8.2) was adopted in some regions, but not implemented yet, because most of RDP were approved last December and we lack of national government to open some of measures (operational groups)
- For Pillar I (basic payment) in wood pastures and grazed rangelands is being a difficult issue. Initially large area of silvopastoral systems were excluded or negatively affected in the prorata process and only few regions selected the Local Established Practices from the National RDP

# Main Activities

- Expo Milano. Lobbying for Agroforestry  
"Agroforestry: sustainably feeding the planet and providing energy"
- Monthly skype meetings
- Several Contributions to the EURAF Newsletters
- Participating in several Civil Dialogue Groups in Brussels and Parliament meetings
- Next month the General Assembly of AGFE will be in Solsona, within an Agroforestry Conference
